

EDUCATION			
YEAR	QUALIFICATION	INSTITUTION	CGPA/PERCENTAGE
2020-2024	B.Tech, Electrical Engineering	Jamia Millia Islamia (NewDelhi),India	8.71/10.0

TECHNICAL SKILLS	
Languages	JavaScript, TypeScript, Java, Python, SQL, C++
Frontend	React.js, Next.js, HTML5, CSS3, Tailwind CSS, Mantine UI, jQuery, Bootstrap
Backend	Node.js, Express.js, NestJS, Spring Boot, REST APIs, Prisma ORM
Databases/Cloud/DevOps	PostgreSQL, MySQL, MongoDB, Redis, AWS, Docker, GitHub Actions, CI/CD, Firebase
Tools & Architecture	Microservices, LLD, OOP, Design Patterns, MVC, JWT, OAuth2, Jest, Postman, Swagger, LLMs

EXPERIENCE	
Full Stack Software Developer at Zylo	Sep'2025-Present
● Co-architected ERP using NestJS and PostgreSQL (Prisma) with Resource, Catalog, Scheduling, Orders, and Audit modules ● Engineered a consecutive-window scheduling algorithm with PostgreSQL pessimistic locking and 15-minute TTL soft reservations to prevent race conditions across concurrent bookings ● Integrated external Aldar APIs for real-time synchronization of installation and order status within the ERP ecosystem ● Implemented an 8-state Order State Machine (DRAFT → CONFIRMED → COMPLETED) with backend-enforced transitions, price snapshots frozen at payment confirmation, and an immutable AuditLog for every status change ● Architected and launched zylosmart.com from scratch using Next.js 14 and Tailwind CSS, delivering 15+ pages across 10 smart home solution categories with full production deployment (DNS, SSL, CDN)	
Full Stack Software Developer at Ekai	Jun'2024-Sep' 2025
● Built Ekai, a Slack LLM bot integrating OpenAI API for contextual chat, document-based training, user-level privacy controls ● Built backend/frontend with Node and Block Kit Builder for file upload and user actions, enabling smooth interaction ● Added privacy control, letting users train Ekai for personal or team use, improving data privacy and collaboration ● Formatted AI responses into Slack markdown for clean display of code, links, and text, improving message clarity and UX ● Implemented OAuth + JWT authentication, encrypted storage, and CI/CD pipelines with GitHub Actions + AWS ● Integrated Drive & Calendar APIs for folder training, auto-ingestion, and meeting-based access with Slack notifications	
Frontend-Focused Full Stack Developer Intern at Quvor	Jul '2023 – Mar '2024
● Developed an e-commerce platform for ShoppingEventVIP (shoppingeventvip.be/en) using React Router v7 and Mantine UI ● Engineered high-converting landing pages with Directus CMS integration, featuring dynamic hero sections, testimonial carousels, partner brand showcases, and tiered pricing plans ● Built 40+ reusable Mantine-first components and optimized frontend performance, reducing page load times by 60% ● Implemented Redis caching layer, cutting API response times by 40% and scaling to support 10,000+ concurrent users ● Implemented (i18n) with multilingual routing (EN/FR/NL) and CMS-based translated content for global reach.	

PROJECTS	
Rate Limiter for API Services Self Project, Backend Development	(View Code)
● Developed a scalable RESTful API using Node.js and Express.js to process social media data and deliver analytics insights ● Designed a high-speed data storage system with Redis to efficiently store user submissions, hashtags, and sentiment ● Implemented tier-based rate limiting in Redis (free/premium/standard) to control API usage and prevent abuse ● Developed an error-handling system with Winston logging, reducing debugging time by 30% and improving API reliability ● Applied Low-Level Design (LLD) principles to ensure a modular, scalable, and high-performance system architecture	
AI-Powered Peer Mock Interview Platform Full Stack Developer	(View Code)
● Built a full-stack mock interview platform simulating DSA, System Design, and LLD interviews with LLMs like Ollama/OpenAI ● Built React frontend with Firebase Auth and protected routes for secure user sessions and dashboard access ● Designed modular LLM backend using factory pattern for easy integration of LLMs(OpenAI, Ollama, and Anthropic) ● Created responsive chat interface with markdown rendering, code highlighting, and real-time message synchronization
