

EDUCATION

YEAR	QUALIFICATION	INSTITUTION	CGPA/PERCENTAGE
2020-2024	B.Tech, Electrical Engineering	Jamia Millia Islamia (NewDelhi),India	8.71/10.0

TECHNICAL SKILLS

Programming & Scripting	JavaScript, TypeScript, Java, C++, Python, Shell, SQL
Frontend Development	HTML5, CSS3, React.js, AngularJS, Mantine, jQuery, Bootstrap, Material Design,, JSON, XML
Backend & Frameworks	Node.js, Express.js, Spring Boot, RESTful APIs, .NET Core
Databases & Cloud	PostgreSQL, MySQL, MongoDB, Redis, AWS, Firebase, DB Security, Caching Strategies
Tools & Architecture	Git, GitHub Actions (CI/CD), Postman, Google APIs, Webpack, Monorepo, Jest, JWT, OAuth, Firebase Auth, LLMs, LLD, OOD, Design Patterns, MVC, Microservices

EXPERIENCE

Full Stack Software Developer at Ekai Jun'2024-Present

- Built Ekai, a **Slack LLM** bot using **OpenAI API** for contextual chat, document-based training, and user-level privacy controls
- Built backend/frontend with **Node** and **Block Kit Builder** for file upload and user actions, enabling smooth interaction
- Added **privacy control**, letting users train Ekai for **personal or team use**, improving data privacy and collaboration
- Formatted AI responses into **Slack markdown** for clean display of code, links, and text, improving message clarity and UX
- Implemented **OAuth + JWT** authentication, encrypted storage, and CI/CD pipelines with GitHub Actions + **AWS**
- Integrated **Drive & Calendar APIs** for folder training, auto-ingestion, and meeting-based access with Slack notifications

Frontend-Focused Full Stack Developer at Quvor Jul '2023 – Mar '2024

- Developed an **e-commerce platform** for ShoppingEventVIP (shoppingeventvip.be/en) using React Router v7 and Mantine UI
- Engineered **high-converting landing pages** with Directus CMS integration, featuring dynamic hero sections, testimonial carousels, partner brand showcases, and tiered pricing plans
- Built **40+ reusable Mantine-first** components and optimized frontend performance, reducing page load times by **60%**
- Implemented **advanced Redis caching** , reducing page load times by **40%** and scaling to support **10,000+ concurrent users**
- Delivered full-stack features: authentication, shopping cart, review, event management, and API integrations using **Swagger**
- Implemented **(i18n)** with **multilingual routing** (EN/FR/NL) and CMS-based translated content for global reach.

Software Developer at Kalvium Dec'2022 - Mar'2023

- Developed **LiveBook**, an interactive learning platform integrating theory, videos, and assessments for students learning
- Built **RESTful APIs** for content retrieval, quiz submissions, and video management, ensuring smooth data flow
- Integrated the **YouTube API** to support in-app video streaming, increasing content accessibility and reducing user drop-off
- Created **Postman test suites** and API specs to improve system reliability and developer onboarding efficiency

PROJECTS

Rate Limiter for API Services | Self Project, Backend Development [\(View Code\)](#)

- Developed a scalable **RESTful API using Node.js and Express.js** to process social media data and deliver analytics insights
- Designed a high-speed data storage system with **Redis** to efficiently store user submissions, hashtags, and sentiment
- Implemented **tier-based rate limiting** in Redis (free/premium/standard) to control API usage and prevent abuse
- Developed an **error-handling system** with **Winston logging**, reducing debugging time by **30%** and improving API reliability
- Applied **Low-Level Design (LLD)** principles to ensure a modular, scalable, and high-performance system architecture

AI-Powered Peer Mock Interview Platform | Full Stack Developer [\(View Code\)](#)

- Built a full-stack mock interview platform simulating DSA, System Design, and LLD interviews with LLMs like **Ollama/OpenAI**
- Built **React frontend** with **Firebase Auth** and **protected routes** for secure **user sessions** and dashboard access
- Designed modular LLM backend using provider **factory pattern** for easy integration of LLMs(OpenAI, Ollama, and Antropic)
- Built context-based state management system for authentication and dynamic AI provider configuration
- Created responsive chat interface with **markdown rendering**, code highlighting, and real-time message synchronization
